F3001/F4001 PORTABLES With a Li-ion Battery

Icom America announced the release of the low end F3001/F4001 in December. The F3001/F4001 comes standard with a Ni-MH battery. Dealers have been asking Icom for that radio with a Li-ion battery.

Starting in March there will be two versions of the F3001/F4001:

- Radio with Ni-MH battery and standard charger
- Radio with a Li-Ion battery and rapid charger

FEATURES:

- *16 Channels
- *Mil-STD 810 and IP54 rating for dust protection and water resistance
- *BP-264 1400mAh Ni-MH standard battery
- *BTL Audio
- *Built-in CTCSS/DTCS encoder/decoder
- *Charger included in the box
- *Automatic scanning and priority scan
- *Low battery alert with blinking LED and low battery beep
- *3-color LED
- *2-step power save
- *Talk around function
- *Time out timer
- *MDC1200, 2-tone or 5-tone
- *Priority scan allows user to monitor 1 or 2 priority channels
